

## MI SERIES BARE COPPER HEATING CABLE

nVent RAYCHEM mineral insulated (MI) series resistance trace heating cables are used for low temperature maintenance applications such as long pipeline heating, condensation prevention and ramp heating. Copper sheath with continuous exposure temperatures to 392 °F/200 °C and typical power outputs to 20 W/ft (65 W/m). Approved for use in hazardous areas.

### FEATURES & BENEFITS

---

Reduced total installed cost

Reduced power supply costs: lower start up currents compared with other technologies

Simple controls: current monitoring on series resistance provides instant visibility on critical circuits

Fast track/expedited service not available for configured heating units
